

## DIGIT'S Cyber-Dough MAKE DELETE! (AND BUZZ, TOO!)

Digit has a cool recipe for Cyber-Dough. It's easy to make, fun to play with...and it has Hacker stumped! The recipe tells exactly how much salt to use, but Hacker can't figure out how much flour, water and oil to add. Can you?

### YOU NEED:

- Salt - 1/4 cup
- Flour - 4 times the measure of salt
- Water - Same as the measure of salt
- Vegetable oil - 1/2 the measure of salt

- Food color (red, yellow, green, blue)\*
- Mixing bowl
- Cookie sheet
- Flat toothpicks
- Large paper clip
- Black marker

\* BE CAREFUL: Food color can stain your fingers and clothes. Wear rubber gloves and an apron when mixing the colors.

### MAKE DIGIT'S CYBER-DOUGH

1. In a bowl, mix the salt and flour.
2. Add water SLOWLY, then the oil.
3. Mush the mixture with your fingers until it feels like clay and makes a ball. (If dough is too sticky, add a little flour. Too stiff? Add a little water.)
4. Break off about half of the dough, and set it aside.

NOTE: Keep any leftover dough in the refrigerator.

### NOW MAKE DELETE!

1. Add 5 drops blue food coloring and 1 drop green to the dough in the bowl. Work the color into the dough until smooth.

TIP: Wear rubber gloves and an apron when mixing colors.

2. Divide the dough into pieces to make Delete's body, arms and legs, and the front of his head. Shape the pieces as shown.

TIP: Do you want to hang Delete on your wall? Open a paper clip to make an 'S' and stick the bottom of the clip into his back. Do this before going on to step 3.

3. Use 2 half-toothpicks to attach the front of Delete's head to his body.

4. Attach the arms and legs.

5. From the uncolored dough you set aside before, break off a piece the size of a Ping-Pong ball. Break off two more pieces the size of marbles.

6. Color the balls as shown.

Ping-Pong size ball:  
2 drops yellow  
One marble size ball:  
3 drops yellow + 1 drop red  
One marble size ball:  
no food color

TIP: Wear rubber gloves and an apron when mixing colors.

7. Use the yellow ball to make Delete's collar and 2 bases for his antennas. Use the orange ball to make 2 ends for his antennas. Use the uncolored ball to make his eyes.

## TO MAKE BUZZ

Make an egg shape out of green clay. Roll a snake from uncolored dough for lips. (Use about 10-12 drops of red food color.) Add antennas and eyes same as for Delete. Draw on details when the dough is dry.

8. Attach the eyes, antennas and collar.

9. Ask a grownup to help you bake Delete. Bake him at 300° for 40 to 45 minutes, or until dry. When Delete is cool, use a black marker to add details as shown.

NOTE: Digit's Cyber-Dough is like clay and is not good to eat.
